

VIBUDHI SAHITHI

Hyderabad, Telangana

9959187402 | vibudhisahithi16@gmail.com | linkedin.com/in/vibudhi-sahithi | github.com/sahithi-vibudhi

Profile

Computer Science Engineering student with hands-on experience in backend development, full-stack applications, and AI/ML. Skilled in Python, FastAPI, PostgreSQL, React, and Machine Learning. Seeking a software development opportunity to apply technical and problem-solving skills.

Education

Stanley College of Engineering and Technology for Women

2023 – 2027

Bachelor of Technology (B.Tech) in Computer Science Engineering

Hyderabad, Telangana

Technical Skills

Languages: Python, Java, C

AI and Machine Learning: Basics of Machine Learning, Artificial Intelligence

Web Development: HTML, CSS

Database: MySQL, PostgreSQL

Developer Tools: VS Code, Google Cloud Platform, Github, Jupyter Notebook

Technologies/Frameworks: React, Scikit-learn

Internship Experience

Edunet Foundation

April 2025 – May 2025

Microsoft AI Initiative, AICTE

Hyderabad, Telangana

- Completed training in Artificial Intelligence and Machine Learning fundamentals.
- Learned concepts such as supervised learning, model evaluation, and data preprocessing.
- Worked with Python tools to understand AI model development and data analysis.

Purview India Consulting and Services LLP

Apr 2026 – Jun 2026

Software Development Intern

Hyderabad, India

- Developed the backend for the Health Check-up Post Call GenAgent using FastAPI and PostgreSQL.
- Built APIs for patient management, call initiation, call logs, and report generation.
- Implemented WebSockets for real-time active call monitoring and live transcripts.

Projects

TrinetraX – Smart Crowd Management System | *React, FastAPI, PostgreSQL, YOLO*

- Developed an AI-powered crowd management system for real-time crowd detection and monitoring.
- Integrated YOLO-based video analysis to detect crowd density and identify peak crowd levels.
- Built a full-stack platform with booking, user management, analytics, and admin monitoring features.

Health Check-up Post Call GenAgent | *FastAPI, PostgreSQL, React, WebSockets, AI*

- Developed an AI-based post-call healthcare application for managing patient interactions and call data.
- Built FastAPI and PostgreSQL APIs for patient management, call logs, and report generation.
- Implemented WebSockets for real-time call monitoring and live transcripts.

Disease Risk Prediction System | *Python, Machine Learning, Scikit-learn*

- Built a machine learning model to predict disease risk using KNN and Naive Bayes.
- Improved model performance through data preprocessing, feature selection, and evaluation.

Certifications

Foundations of AI – Microsoft Initiative (Edunet Foundation AICTE)

EICT Academy – IIT Kanpur

IoT Bootcamp – NIELIT Aurangabad

Achievements & Activities

- * Participated in the internal round of Smart India Hackathon
- * Participated in the BEC Vision Ideathon
- * Attended Chevening Conversations on Cyber Security
